NEW CloudSURVEY Mapping Portal

Siretta is proud to announce that we have launched our new SNYPER Mapping Portal called CloudSURVEY.

The CloudSURVEY portal allows you to export and save all of your cellular survey results from a compatible SNYPER product to your account in the cloud.

The CloudSURVEY software has a host of features, allowing you to view approximate base-station positions on a map and determine the most suitable network for your application.

Access to the portal is free and the tokens are chargeable. We have created a Datasheet and User Manual to help you with step by step guidance to use the CloudSURVEY portal. Why not find out what you could be gaining from CloudSURVEY by visiting the product page: SNYPER CloudSURVEY Portal

Take a look at the CloudSURVEY portal by visiting www.cloud-survey.co.uk and create your login to start downloading your surveys today!
