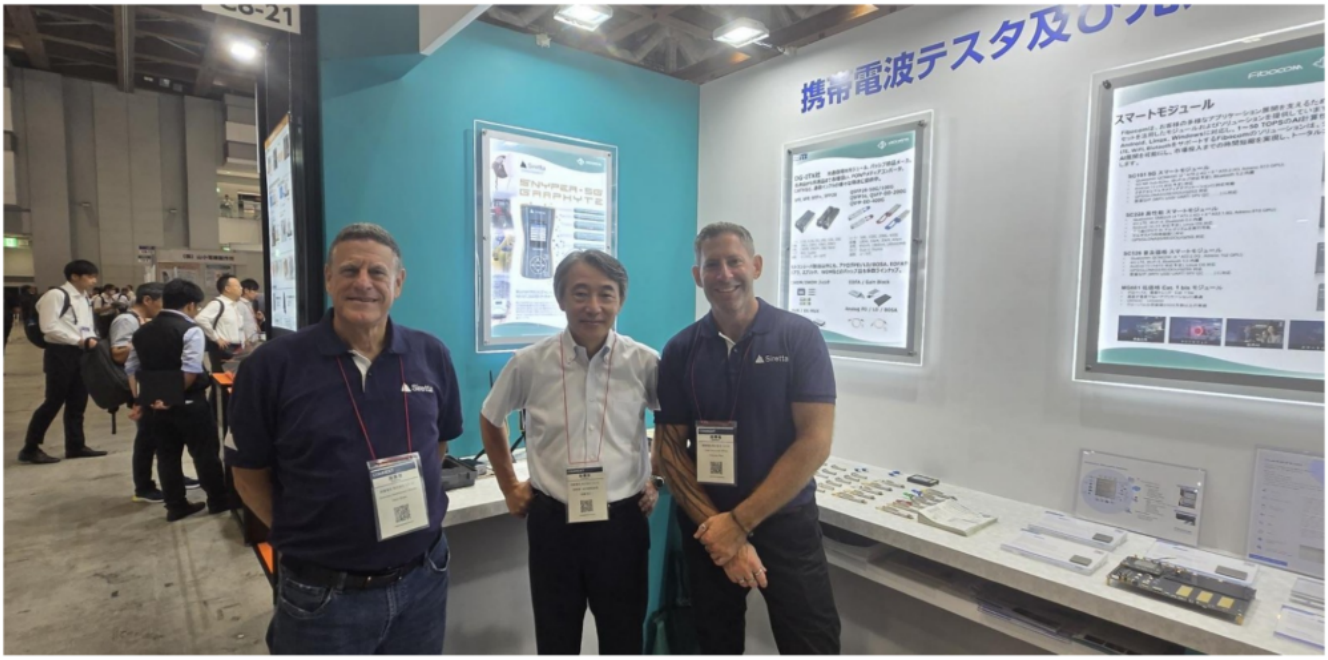
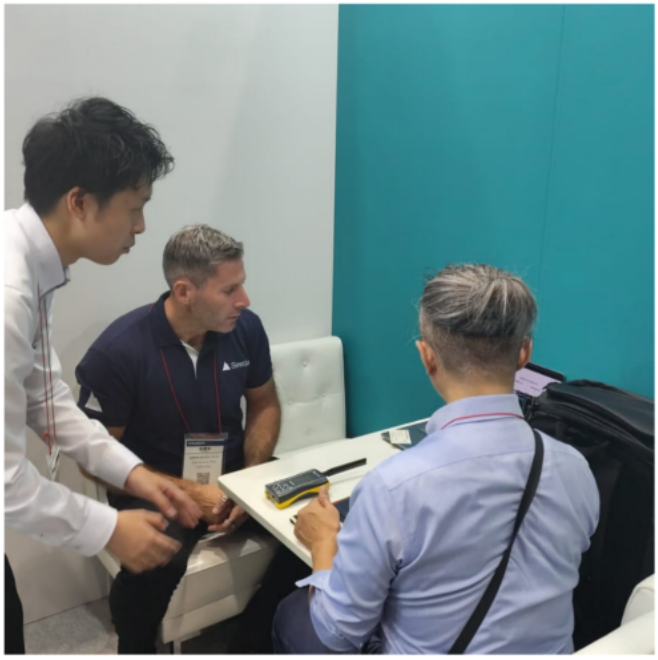
Siretta Supports New Japanese Partner at COMNEXT Japan





Siretta was proud to support our new Japanese distribution partner, Midoriya Electric, at **COMNEXT Japan**.

Together, we showcased the **SNYPER-5G**, our advanced cellular network analyser, to visitors from across the region.

The event provided an excellent platform to demonstrate how the SNYPER-5G can help businesses survey, identify, and optimise mobile network connectivity — supporting the rollout of advanced 5G, LTE, and IoT solutions across Japan.

We look forward to building on this exciting partnership and expanding Siretta's presence in the Japanese market.
