

CLOUD SURVEY

A storage and mapping portal for SNYPER cellular survey data.*

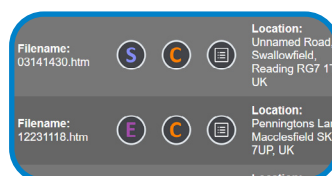

The fastest way
to select the best
network.

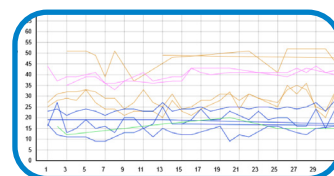

- Use the SNYPER in the intended device location to make extensive tests on all available networks
- Upload the results to the CloudSURVEY portal
- Log-in to store new survey results and find previously stored results.

Cell Tower Map

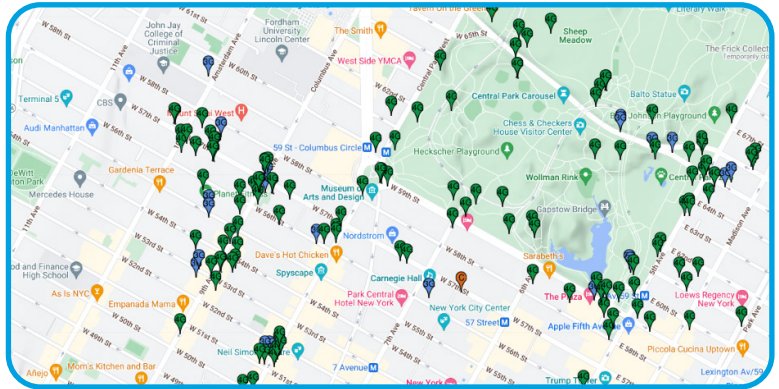

Survey Results

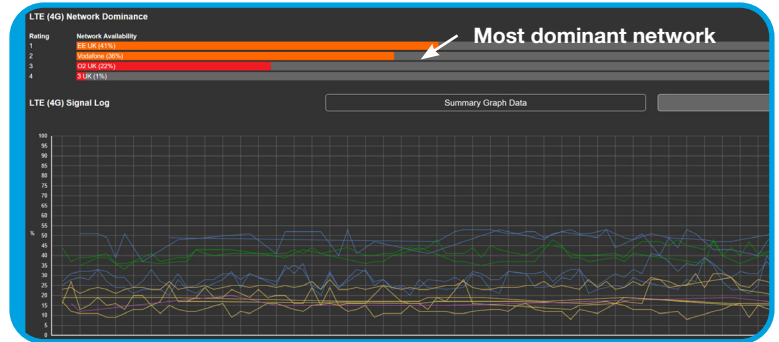

Signal Log

- CloudSURVEY maps show approximate cellular mast positions
- Toggle feature for signal and network filtering
- Hover feature on cellular mast markers allows display of base-station attributes
- Compare feature allows comparison of surveys from different points in time
- Surveys can be bookmarked/categorised
- Multiple SNYPER devices can be used on the same user account

- Charts and graphs provide “decision-making” data to aid selection of mobile network operator (MNO)
- Network summary charts display the number of cell towers visible by MNO
- Signal strength bar charts highlight the strongest networks by technology type
- Signal Logs show comparative network performance per survey

HTML bar charts help determine MNO Performance
