

## INDUSTRIAL INTERNET OF THINGS

### *Who Are We And What Do We Do?*

**Siretta has been at the forefront of Industrial IoT applications since 1998, providing wireless technology solutions for remote equipment communication in order to achieve consistent and reliable performance and connectivity. Siretta are able to work with customers to provide specific application solutions.**

Siretta has two families of modems, the reputable ZETA modems and the intelligent “plug and play” SL500 modems which provide connectivity from remote equipment to a client’s server. SL500 solutions also come with Cloud portal management.

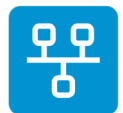

Siretta also has a range of Industrial Routers for solutions requiring Wifi and LAN connectivity as well as cellular. The ever-expanding QUARTZ family of industrial Routers now includes 5G offerings.

Siretta has a vast range of Industrial IoT Antennas to suit a multitude of applications. These are also supported with RF extension cables, pigtails and adapters to provide the flexibility required to complete an IoT antenna solution.

For assistance with installs and service of cellular site locations, Siretta has a class leading range of cellular signal strength analysers, known as the SNYPER family, with coverage in many parts of the globe.

# Global Manufacturer of Industrial IoT Solutions

## What's In Our Product Portfolio?

*Siretta offer a wide range of products that have been specifically designed for use in Industrial IoT applications.*

- **Cellular Network Analysers** covering 5G/4G/3G/2G and CatM1/NB-IoT with **Signal/Performance Mapping** and Cloud Management portal
- Industrial high reliability **Cellular Routers supporting 5G/4G/3G**
- The **World's Lowest Power Cellular Modems** for 4G & LTE CatM1/NB-IoT connectivity
- **Intelligent Plug N Play Cellular Modems** with cloud management portal supporting 4G & LTE CatM1/NB-IoT
- **High Performance Antenna Solutions** with customisation and design services
- High quality **Low Loss RF Cables and Pigtailed** with customisation service
- World class **Distribution Network** to meet your delivery needs

Alongside a class-leading product offering, Siretta provides expert technical advice with dedicated support engineers.

To discuss your application further, call us: **+44 (0)118 976 9000**
